This is the 'must have' reference for any new designer, decorator, or workroom. Introduced in this book are the basic principles and terminology the soft window treatment specialist needs to know. Included are sections for all of the 11 basic categories of window treatments, and it also includes chapters covering bedding, pillows, soft accessories, and add-on items. Over 300 pages of information, diagrams, useful tables and charts.

### Testimonials:

"I have just reviewed **ELEMENTS OF SOFT TREATMENTS** and I have to say WOW! This book is presenting the primary information that a new designer, decorator or workroom needs to know. The fine details may vary a little from one window covering specialist to another, but the meat is here and that's what matters. It has a wealth of good professional drawings of window treatments and it's organized well to make it an easy-read and reference book. The fact that it is set up as a text book with questions at the end of each chapter is a major plus. My first response to Kirk was to please get this book into ALL Interior Design curriculums and get it required! It should also be required reading for every new workroom. Thank you, Kirk and Barbara for a job well done!"
